

Nguyen Thai Nam

SAP ABAP Developer (Fresher / Intern)

📞 (+84) 378 290 909 | ✉️ namhocfpt04@gmail.com | | 🌐 [GitHub](#) | 📍 Thu Duc, HCMC

PROFESSIONAL SUMMARY

Final-year Software Engineering student with hands-on experience in SAP ABAP backend and modern web development. Specialized in SAP S/4HANA utilizing Modern ABAP (7.40+), Object-Oriented ABAP, CDS, and RAP. Successfully transitioned from a ReactJS/NextJS frontend background to SAP backend, bringing a strong understanding of end-to-end integration and API consumption. Passionate about building scalable, clean-code, and SAP-compliant enterprise solutions.

EDUCATION

FPT University

Bachelor of Software Engineering (Semester 9/9) | GPA: 3.0/4.0

2022 – Present

Ho Chi Minh City, VN

EXPERIENCE

FPT Software

SAP ABAP Intern

Jan. 2025 – Apr. 2025

Ho Chi Minh City, VN

- Engaged in enterprise-level SAP S/4HANA development, actively writing and enhancing backend applications using Modern ABAP (7.40+) and Object-Oriented principles.
- Utilized Open SQL, Eclipse ADT, and advanced debugging techniques to troubleshoot and optimize custom business logic.
- Ensured high code quality and compliance with SAP Clean Code guidelines by rigorously executing ABAP Test Cockpit (ATC) and Extended Program Check (SLIN).

PROJECTS

Background Job Scheduling & Management System (BJSMS) | SAP Capstone

2024

- **Role & Tech Stack:** Backend ABAP Developer | Modern ABAP, RAP (Unmanaged), CDS, OOA, Open SQL
- Designed and developed a centralized Background Job Management platform on SAP S/4HANA as an intuitive alternative to standard SM36/SM37 transactions.
- Implemented RAP (Unmanaged) business logic and exposed OData Services for SAP Fiori integration.
- Integrated SAP Function Modules (JOB_OPEN, JOB_SUBMIT, JOB_CLOSE) to automate the complete background job lifecycle.
- Optimized Open SQL queries by eliminating SELECT-in-LOOP patterns, reducing database round trips and improving execution efficiency.

Aidonia (E-Commerce) | Frontend Developer (NextJS, Firebase, REST API)

2024

- Developed responsive UI and integrated Firebase/REST APIs for real-time chat, product management, and premium payment workflows.

Koi Care At Home Platform | Frontend Developer (ReactJS, Ant Design, REST API)

2024

- Built an intuitive home-service booking interface, ensuring seamless RESTful API integration for booking workflows and media uploads.

SKILLS

SAP Technologies: Modern ABAP (7.40+), Object-Oriented ABAP (OOA), RAP (Unmanaged), CDS, OData Services, Open SQL, BAPIs, Background Jobs, ALV

SAP Tools: Eclipse ADT, SAP GUI, ABAP Test Cockpit (ATC), SLIN

Web Development: ReactJS, NextJS, JavaScript, TypeScript, HTML5/CSS3, REST APIs

Core Competencies: Clean Code, Object-Oriented Design, Performance Optimization, Git

Languages: Vietnamese (Native), English (Professional Working Proficiency)
